

Name: Julio Febrian

Bangkit ID: M2010F1099

Study Group: ML-16

Assignment: Professional Branding & Interview Communication

Professional Summary

Hi! My name is Julio Febrian. I am an industrial engineering student who love working with statistic and dreaming to be a future machine learning engineer in a great tech company such as Google. I have been learning about statistics and dealing with data for 2 years. Currently, I am studying in the 6th semester at Universitas Indonesia with a GPA of 3.66. I had several committee experiences, won third place in a mathematics competition, and participated in a paper presentation on international conference of industrial engineering. Now, I am actively participating in a program that teach me about machine learning. For the next semester, I am seeking an internship opportunity to start a step forward in understanding a professional working experience. I am an ambitious, visionary, motivated and dedicated person who believe that I still have a long journey ahead and could grow continuously in the company. I would like to be a part of the company and eager to help in achieving the company's goals.
